LAND OF INNOVATIVE DECORATIVE
PANELS AND STONES

CREATIVE SOLUTION

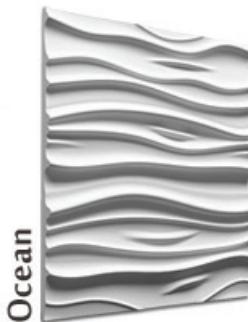

Creative-wall is a collection of innovative products that create graceful architectural features with natural gypsum components. All edges and joints interlock for quick, accurate alignment and superior joint stability. Borrowing from the idea of drywall, the seams are blended with a fortified filler, allowing the creation of a seamless sculpted surface or 3-dimensional wall of nearly any size. All Creative-wall panels and decorative stones are: smooth, lightweight, durable, fire-safe and healthy.

Designed with the intention of creative play with form and light. You can make your interior one of a kind, individually arranging a chosen model.

EASY INSTALLATION AND COLORING

FAST INSTALLATION

Fast and easy installation is the key to quick interior redecoration. Thanks to modular form of Creative-wall panels, the installation can also be a creative process.

100% ECO PRODUCT

Decorative panels we manufacture, are not just stylish but also environmentally friendly. Their production includes only natural components, gypsum mostly, they are 100% safe for people and environment.

COLOR

The greatest advantage of Creative-wall panels are the unlimited options of color compositions. You can change the color using any interior paint available on the market. The sky is the limit.
